You can try using Shopify's Smart Product Filter & Search app <sup>1</sup> which allows you to filter products instantly by price, size, color, tag, vendor, brand, collection and metafields. It's easy to install and customize your Product filter menu. It also has a powerful search solution with instant suggestions and autocorrect <sup>1</sup>.

Another option is Filterific <sup>2</sup> which allows you to create custom filters like type, vendor, size, and color. You can use filters as custom navigation menus to help shoppers find their way around. You can show or hide out of stock variants and use the autotag feature to have the app sort and tag products for you <sup>2</sup>.

If you want to make a collection filter by product variants (colors/sizes), you can follow this guide <sup>3</sup>.
