How do I create a product locator

✓ Searching for: **how to create a product locator**

✓ Generating answers for you...

Here are some steps you can follow to create a product locator ¹ ² ³ :

1. Create categories for each product or product type.
2. Create an interface to display your product finder.
3. Prepare a table with custom data columns that will be automatically generated as filters.
4. Include an "Image URL" column with public image links and a "Call-to-action" column with a link to the website, contact form or make a booking etc.

I hope this helps!
